Co-Enrollment: Part 1

Service Integration, Common Exit, and Technology

Annie Leonetti

US Department of Labor

Today's Objectives:

- ✓ Define Co-enrollment
- ✓ Identify Challenges to Implementing Co-enrollment
- ✓ Explore Co-enrollment Opportunities in WIOA
- ✓ Discuss How to Operationalize Service Integration
- ✓ Explore Relationship between Common Exit and Co-enrollment
- ✓ Discuss Technology – Is it a Tool for or Hindrance to Co-enrollment?

1

Defining Co-enrollment

- How do you define co-enrollment?
- What does co-enrollment look like from:
 - ▶ A program operations perspective?
 - ▶ A service provision perspective?
 - ▶ A reporting perspective?
 - ▶ A partnership perspective?
 - ▶ A participant perspective?

2

Challenges Implementing Co-enrollment

- What are some of the barriers to co-enrollment at the state level? At the local level?
- What are some of the specific challenges that exist around those barriers?
- What are some of the specific work-arounds or solutions you have identified to overcome those barriers?

3

Co-enrollment Opportunities in WIOA

- What new opportunities do you see under WIOA around the implementation of co-enrollment policies and practices?
 - ▶ Required partnerships
 - ▶ Aligned reporting
 - ▶ Shared outcomes
 - ▶ AJC network
 - ▶ Infrastructure funding
 - ▶ Data sharing

4

Operationalizing Service Integration

- What is service integration and co-case management?
- What do you need, from a program management perspective, to operationalize service integration?
- What administrative barriers might impede service integration? What cultural barriers might impede service integration?
- How do you overcome these barriers?

5

Common Exit and Co-enrollment

- How do Common Exit policies and Co-enrollment policies interact?
- Can you have Co-enrollment without Common Exit?
- Can you have Common Exit without Co-enrollment?

6

Technology: A Tool for or Hindrance to Co-enrollment?

- What role does technology play in co-enrollment?
- What useful technology tools help to enable co-enrollment?
- In what ways does your current technology (case management or administrative data systems, etc.) hinder co-enrollment?
- What would your ideal technology include to enable widespread co-enrollment?

Final Thoughts?

Thank You!
