

TAADI APPROACH

The Vision

- Why the TAADI Approach?
 - Systematic review of data
 - Data Flags for follow up
 - Standardizes protocols for having conversations about reported data
 - Quarterly and annual protocols

How does TAADI Work

- Quarterly report cards are generated through automated processes
 - States that do not meet targets are required to provide responses as to why target was not met
 - Results that meet targets do not require responses
- Annual reviews are conducted based on 4 quarters of activity with special focus on the 4th quarter
 - TAADI is not structured to require perfection, but rather improvement
 - States that have performed poorly all year but improve at the end will be marked accordingly
 - Three categories
 - Successful
 - Area of Concern
 - Recommendation of Finding

What does TAADI measure

- Types of data reviewed in TAADI
 - Fiscal Alignment (PIRL vs. 9130)
 - Underreporting or Substandard Program Delivery Implications
 - Standardized Code Problems
 - Wage outliers
 - Employment data not reported timely for performance calculations

TAADI Report Card – Quarterly results

Measure	Target	FY17 Q1 (As of 03/01/17)	FY17 Q2 (As of 05/24/17)	FY17 Q3 (As of 09/08/17)	FY17 Q4 (As of 03/05/18)	Problem Type (Drop Down Menu)	Solve by Quarter	Resolution (250 Character Limit)
