

Modern Manufacturing Requires a Different Kind of Muscle

Stop thinking of manufacturing as a “man’s job” that requires heavy lifting and dirties your hands. Start thinking about what it truly is and what it can offer you as a woman — the chance to use your brainpower to tackle challenging projects while utilizing new technology and earning excellent pay.

Technical Education*

Manufacturing Is For You

In Waubonsee's local geographical area, there are more than 35,000 manufacturing jobs, and one of them could be filled by you. All you need is a desire to design, create and/or make products that solve problems and help people.

While you make a difference in the world, you'll also be making money; according to the Manufacturing Institute, manufacturing jobs typically pay about 9 percent more in salaries and benefits than jobs in other industries.

In addition to good pay, modern manufacturing offers variety. There is a job for almost every skill set. For example, if you like art and design, you can conceptualize products through computer-aided design and drafting (CAD). If you like logic, order and processes, you may want to look at automation. If you pride yourself on being precise and detail-oriented, machining may be a fit for you.

Waubonsee Is For You

No matter what aspect of manufacturing you want to work in, Waubonsee can help prepare you. Our caring instructors, small class sizes and state-of-the-art labs combine to give you the best preparation for your new career.

Women make up almost half of the country's workforce but only a quarter of the manufacturing industry's workforce.

You can help change that – and make a difference (and some decent money) at the same time.
